ABOUT

SPACE CANADA

Space Canada represents Canada's space innovators and ecosystem to convey the value of space technology, research, and investment to domestic and international audiences.

Space Canada, launched in March of 2022 by nine founding members, now has over 60 leading Canadian space innovators and organizations from coast-to-coast as members that is composed of the private sector - from start-ups to large global companies - academic institutions, and not-for-profit organizations.

Space Canada members are investing billions of dollars here in Canada and have facilities across the country employing thousands of people in Canada and around the world with a strong emphasis on STEM and innovation.

The work Canadian space innovators do in orbit and on the ground puts people to work and consistently pushes and expands the envelope of Canada's potential.

ABOUT

THE EVENT: SPACEBOUND 2023

The three-day event will be held in Ottawa from October 17-19, 2023.

Space Day on the Hill will open the event on October 17, an opportunity for members of Space Canada to engage with elected officials, political staffers, and public servants involved in the space sector.

Space Canada's Parliamentary Reception will follow at the Sir John A. MacDonald building from 5-7 p.m. The reception will feature a variety of guest speakers, industry leaders and networking with parliamentarians, government officials from key strategic partners for the space ecosystem. The reception is open to all SpaceBound 2023 conference attendees.

Space Canada's annual conference entitled SpaceBound 2023 will take place at the Canadian Nature Museum in Ottawa on October 18-19. The two-day conference will feature networking opportunities with thought leaders from the space ecosystem and discussions on key topics and industry trends.

Don't miss this unique opportunity to meet your fellow Space Canada members and discuss how to strengthen and grow the space sector throughout the country.

ABOUT

THE EVENT: SPACEBOUND 2022

NETWORKING OPPORTUNITIES

Across the 3-day annual conference, including Space Canada's Parliamentary Reception, SpaceBound Conference, social events, and more, SpaceBound 2022 welcomed over 400+ professionals with an interest in the Canadian Space sector.

LEADING SPACE INNOVATORS

SpaceBound 2022 was attended by over 100 unique organizations, from leading Canadian Space Innovators to Academic institutions, non-governmental organizations, and media outlets.

KEYNOTE SPEAKERS

Space Canada was pleased to welcome impressive speakers in 2022, including Canadian Space Agency astronaut Jeremy Hansen, President of the CSA Lisa Campbell, two Federal Cabinet Ministers, former minister and astronaut, Marc Garneau, representatives of NASA, and more.
